

MegaMeeting Server Side Recording

MegaMeeting **Server Side Recording** is an additional feature which can be added to a MegaMeeting.com Video & Web Conferencing account. It allows hosts to create a recorded video of on-screen activity as well as all VoIP audio that takes place within a MegaMeeting video/web conference. Hosts are able to record, save and archive meetings for future use.

Record Your Online Meetings for:

- Future Sales Presentations & Webinars
- Training Sessions for New Hires
- Tutorials for Customer Support
- Employees/Prospects/Customers Unable to Attend Meetings
- Building a Training Reference Library
